NOTES

Vítejte ve světě Crystalex

Zakoupili jste jedinečný skleněný výrobek nejvyšší kvality. Crystalex pokračuje v tradici českého skla a křišťálu, a využívá nejmodernějších technologií, které zajišťují ekologickou udržitelnost a snižují uhlíkovou stopu. Tento výrobek v sobě snoubí nejmodernější design s pokročilými výrobními procesy, a my jsme hrdí na to, že naše výrobky posíláme zákazníkům po celém světě. Pevně věříme, že s výrobky Crystalex strávíte mnoho třípytíových chvil!

Doporučená péče o sklo Crystalex

- Dekorované výrobky, zlatem, platinou nebo barvami, nejsou určeny do myček na nádobí. Umývejte ručně ve vlažné vodě, jemnou houbičkou s použitím neagresivního detergentu. Po umytí ošetřete sklo měkkou utěrkou.
- Pro ostatní sklo je možno použít myčku, nastavte program s nízkou teplotou, šetrný ke sklu, po skončení mycího cyklu otevřete dvířka myčky – kondenzované výpary sklu škodí.
- Při manipulaci by nemělo docházet ke kontaktu s tvrdými předměty, včetně skla – hrozí poškrábání.
- Výrobky nejsou určeny k servírování horkých nápojů a k použití v mikrovlnných troubách.
- S výrobkem zacházejte opatrně, abyste předešli poškození nebo poranění. Nenechte se sklem manipulovat děti.

Welcome to the world of Crystalex

You have purchased a unique glass product of the highest quality. Crystalex carries on the centuries-old tradition of Bohemian glass and crystal using modern industrial methods, assuring ecological sustainability and reducing the carbon footprint. The product you have just received merges state-of-the-art design with cutting-edge manufacture, and we take pride in shipping some of the world's highest-grade glass and crystal products to customers worldwide. We are confident that the pleasant moments spent with your Crystalex glassware will positively sparkle!

How to care of your Crystalex glass product

- Please note that decorated products, whether it be with gold, platinum or paint, should never be machine-washed. Wash such a product by hand in lukewarm water, using a soft sponge and a mild, non-aggressive detergent. Treat the glass with a soft cloth after washing.
- It is possible to use a dishwasher for washing other glass products. In such cases, set the dishwasher at a glass-friendly program running at low temperature, and open its door as soon as the washing cycle finishes. Condensed vapors cause harm to glass.
- When handling the glass, avoid any contact with hard objects including other glass; there is a danger of being scratched.
- Products are not intended to be used for serving hot beverages or placed in microwave ovens.
- Handle the product carefully to avoid either damage or injury, and never allow children to handle the glass.

Приветствуем вас в мире Crystalex

Вы приобрели уникальное изделие из стекла самого высокого качества. Компания Crystalex продолжает традицию чешского стекла и хрусталя, используя для этого самые современные технологии, обеспечивающие экологическую устойчивость и уменьшающие углеродный след. Данное изделие является воплощением самого современного дизайна и высокотехнологичных производственных процессов, и мы гордимся тем, что наши уникальные чешские изделия пользуются спросом по всему миру. Мы очень надеемся, что изделия Crystalex разделят с вами немало знаменательных жизненных событий!

Рекомендации по уходу за стеклом Crystalex

- Изделия, декорированные золотом, платиной или красками, не предназначены для мытья в посудомоечных машинах. Мойте их вручную мягкой губкой в теплой воде, используя моющее средство без агрессивных компонентов. После мытья протрите стекло мягким полотенцем.
- Остальные изделия из стекла можно мыть в посудомоечной машине. Для этого выберите щадящий режим с низкой температурой; после окончания моющего цикла откройте дверцу машины, чтобы конденсат не повредил стекло.
- Во избежание возникновения царапин при обращении со стеклянными изделиями не допускайте их контакта с твердыми предметами, в том числе с другими предметами из стекла.
- Изделия не предназначены для сервировки горячих напитков и использования в микроволновых печах.
- При обращении с изделиями будьте осторожны, чтобы не допустить пореза или иного ущерба. Не разрешайте детям играть со стеклом.

crystalex.cz/ru

Our environmental and social responsibility

The Crystalex CZ, s.r.o. strategy is based on the economical and environmentally friendly use of resources and responsible behavior. Whether it is the energy consumption, cleanliness and safety of the materials we work with or the life quality of our employees and the region, our work always involves the least possible strain on the environment.

Electric melting without emissions

Energy

Our glass is one of the most eco-friendly melted glasses ever. We use a fully electrical method for heating the melting unit and inlet channels. In addition, the melting units emit minimal noise, dust and heat, thus burdening the environment as little as possible.

Our all-electric melting system produces no pollutants. We use advanced software tools to extend the life of our production facilities and optimize production.

We use melting furnaces of our own design, which we continuously upgrade and optimize for the cleanest possible operation in line with our environmental policy and applicable directives. For example, in 2022 the company managed to reduce the absolute consumption of natural gas by more than 30% while maintaining the same production volume.

Local resources

Resources

76.5% of raw materials come from our region or nearby. This ensures short transport routes, which also goes for the delivery of common spare parts, packaging materials and other services.

Recycling 90% of glass

Recycled packaging

Recycling

All our packaging is recyclable and its production comprises 94% recycled content. The packaging material is additionally always fully compliant with the FSC (Forest Stewardship Council) requirements.

We return our internal cullet from the production process to the glass charge as much as possible, approximately 90%.

Responsible water management

Without heavy metals

Water

The electrical units, including auxiliary equipment, are cooled by water from an open circuit, where the water is subsequently cleaned, cooled and returned to the cycle.

The production area is supplied with drinking water from our own sources. We continuously improve our material and energy management: for example, our operations utilize residual waste heat from the production units and warm water from the melting units and central compressor station, which we then use to preheat water for further use.

We are additionally designing circulation systems to cool the moulding tools and electrical distributors. In general, we want to increasingly return more pumped water for further use and, in the future, we plan to make use of the subsidy programmes of the Czech Ministry of the Environment to further improve our water management.

Social responsibility

Company

We address a wide range of topics in the sphere of corporate social policy. We are a member of SEDEX and regularly audit our company against SMETA standards; we undergo a number of supplier audits in social policy.

Crystalex CZ has established a code of ethics based on the principles of equal access to and respect for all employees, zero tolerance of any form of abuse, the right to privacy and the protection of the dignity and health of employees.

We support our employees' professional and personal development and uphold business ethics in accordance with the legislation and standards to which we are committed.

Aware of our existence in the context of the region and its people, we actively support regional cultural and social life, and help those in need.

Crystalex CZ maintains EU ISO 9001, ISO 14001 and ISO 45001 certification, which relate to quality, environmental and occupational safety standards. Our goal is to further obtain ISO 50001 certification in the near future.
