

HERBS COLLECTION

  
CRYSTALEX

The Herbs collection has bloomed just for you. Designed with respect and love for nature, it captures its beauty in myriad forms. Herbs will enchant you with a timeless color palette and its subtle décor of small insects, healing herbs and wildflowers, letting you experience the lush richness of our planet.

**Herbs glassware**  
Wildflowers and small insects have always been our fellow travelers. That is why we decided to commemorate their friendship in the Herbs collection. While one side depicts elegant healing herbs, the other depicts small, intrepid insects. When pouring in the beverage, their optical magic makes the small organisms grow in size. Each package contains a set of four variously decorated glasses.

**Herbs Vases**  
Invite a piece of nature into your home with the spray-colored Herbs vases, showing a blooming spring meadow full of color and flitting butterflies. The harmonious design works with modern color schemes and trends, and shows just how lush and fascinating nature can be.
